

*Bizdaily 'Morality and AI' 8 Nov 2022*

the string theory

a marionette

the ethical dilemmas

a sentient being

to set off a debate

widening inequality

social implications

bias built into the systems

facial recognition

credit scoring systems

be trained on data sets

eerie

an image generator

skewed demographic

clunky

to randomise

a computer-science background

to perpetuate sth

offensive / racist statements

in a driving seat

to grapple with sth

to swerve sth

to flout the traffic laws

to cross on the red line

a philosophical conundrum

a common feature

a novel scenario

to turn your focus to sth

in live trials

to automate human actions

to read emotions

concerns about privacy

scientifically flawed analyses

a new shining tool

a waste of business resources

a word of caution
