*Bizdaily 23 June 2026 AI chips*

run on chips

get rich off ...

out of nowhere

follow the money behind AI

GPUs

capital-intensive

a generation ahead

bring it to market

the blueprint

a factory for hire

beyond the reach of ...

the cutting edge

a sobering answer

to underpin the global economy

the chips supply chain

the sole provider

EUV equipment (extreme ultraviolet)

bespoke applications

to push the limits of physics

phenomenal precision

a choke point

numbers hard to take in

retaliation

supply chain crunches

cause a cascade of issues

no back-up island

keep sm awake at night

to blockade key ports

rehearsals

to cut off access

to dwarf sth

to face immediate disruption

a surge of inflation

a full-blown conflict

to race to build AI

the computing power
